

U.S. Climate Finance Overview (Fiscal Years 2010-2013)

This document provides detailed data for U.S. climate finance for Fiscal Year 2013 and a summary of funds for Fiscal Years 2010-2013. Additional information is available at www.state.gov/climatefinance. The FY 2013 data presented here is current as of October 2014.

Fiscal Year 2010-2013 Summary Table¹

<i>By Channel (in US\$ millions)</i>					
Channel	2010	2011	2012	2013	Total
Congressionally Appropriated Grant-based Assistance	1,587.9	1,884.1	1,261.7	1,217.4	5,951.1
Development Finance	155.1	1,114.8	721.6	1,210.8	3,202.3
Export Credit	253.2	194.7	301.2	228.1	977.2
Total	1,996.2	3,193.6	2,284.5	2,656.3	10,130.6
<i>Congressionally Appropriated Grant-based Assistance by Pillar (in US\$ millions)</i>					
Pillar	2010	2011	2012	2013	Total
Adaptation	430.3	560.2	398.2	395.6	1,784.3
Clean Energy	915.3	962.4	585.9	590.9	3,054.5
Sustainable Landscapes	242.4	361.5	277.5	230.9	1,112.3
Total	1,587.9	1,884.1	1,261.7	1,217.4	5,951.1

¹ Included in these totals are (1) activities that were conceived and funded specifically to achieve climate-related objectives, and (2) activities that provide climate co-benefits (e.g., biodiversity and food security activities). In cases where a portion of a program's budget supports climate benefits, only that portion has been counted. Congressionally appropriated grant-based assistance is channeled through USAID, State, Treasury, MCC, and other USG agencies; development finance is channeled through the Overseas Private Investment Corporation (OPIC); export credit is channeled through the Export-Import Bank.

2013 Data - Multilateral, Bilateral, and Regional Contributions Related to the Implementation of the UNFCCC

(in US\$ millions)

The table below includes grant-based assistance, development finance, and export credit, and combines direct climate funding and activities that provide climate co-benefits (see note 1 above for more information). In the case of grant-based assistance, two important caveats: First, some countries that benefit from U.S. climate finance are not listed here. This happens in cases where a country does not benefit from bilateral programs but instead from activities and funds that are categorized as "Multiple Countries" or "Multilateral" and not disaggregated by country. Second, for many countries, these data under-represent the total U.S. assistance benefiting that country. This happens in the following cases: (a) a country benefits from additional funding through regional or global programs, which are not disaggregated by country; and/or(b) that country benefits from multilateral programs (e.g., Climate Investment Funds, Global Environment Facility, etc.), to which the U.S. contributes a portion. Please note that neither of these tables captures U.S. contributions to the ordinary capital resources of multilateral development banks, a portion of which are used to finance climate-specific activities.

Recipient Country/Region	Energy	Forestry and Agriculture	Adaptation	Total
Congressionally Appropriated Assistance	590.9	230.9	395.6	1,217.4
Multilateral	240.6	66.9	121.5	429.0
Clean Technology Fund	196.2	0.0	0.0	196.2
Forest Investment Program	0.0	11.9	0.0	11.9
Global Environment Facility (climate-attributable)	32.5	30.0	0.0	62.5
Initiative for Sustainable Forest Landscapes	0.0	25.0	0.0	25.0
Least Developed Countries Fund	0.0	0.0	25.0	25.0
Pilot Program for Climate Resilience	0.0	0.0	86.5	86.5
